**Familiar:** Node js | JWT

**Tools:** Vs Code | GitHub | Netlify | Vercel | Figma

## Projects

**Flavors of Italy** (Italian Restaurant Website) [Live Link](#) | [GitHub Link](#) > [Client](#) | [Server](#)

- ✚ **User-friendly design:** This website should be easy to navigate and use for potential customers. This includes having a clear and concise menu, easy-to-find contact information, and a responsive design that works well on all devices.
- ✚ **Mobile-friendly:** This website should be designed to be viewed on mobile devices, as more and more people are using their phones to browse the web.
- ✚ **Technologies:** This website was build using **React js** for client side and **Express js** for Back end. I used **Tailwind CSS** for styling and make responsive this website.

**Tiny Riders** (A car toy shop website) [Live Link](#) | [GitHub Link](#) > [Client](#) | [Server](#)

- ✚ **Wide selection of toy cars:** This website should offer a wide selection of toy cars to choose from, including a variety of brands, styles, and sizes. This will appeal to a wider range of customers.
- ✚ **Add Toys:** In this website a user can add toys with details.
- ✚ **User-friendly design:** Your website should be easy to navigate and use for potential customers. This includes having a clear and concise search bar, and a responsive design that works well on all devices.
